

Product Reliability and Usage Statement

To: HI-FOCUS ELECTRONICS INDIA PVT LTD.

Dear Sir/Madam,

In response to your inquiry regarding the reliability and usage status of our two motor models, we hereby provide the following information for your reference.

The models covered in this document are as follows:

1. Model: YT30028FB, IR-JZ-DK-5MP+H184+IR0109
2. Model: YT30028FB, IR-JZ-DK-2MP+H184+IR0109
3. Product Reliability Test Description

Reliability testing has been conducted on the above two motor models under continuous operation conditions. The test conditions and results are as follows:

Test condition: Minimum operating voltage 5V, ambient temperature 25°C (room temperature)

Test result: The motors meet the requirement of 100,000 operation cycles under the test conditions. The product performance remains stable and complies with relevant reliability standards.

MTBF (Mean Time Between Failures) Calculation Example:

Assuming the product operates twice per hour and each operation lasts 1 hour, the total working time for 100,000 cycles is:

$$100,000 \times 1 \text{ hour} = 100,000 \text{ hours}$$

2. Failure Rate Description

Based on customer usage statistics for the above motor models in 2025, the data is as follows:

Total units in use: 101,700 units

Number of defective units: 67 units

Failure rate: $67 / 101,700 \approx 0.06588\%$

Note: The above failure rate is based on 2025 customer usage statistics and is provided for reference only. It does not constitute a formal product quality commitment.

We will continue to provide high-quality products and services and will further optimize product performance based on actual usage conditions.
